Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 101

Claims 1-7 rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims are directed to two classes of invention, an apparatus, and a method (see last limitation of claim 1 and 3rd and 4th limitation claim 6). Statutory claims are limited to a single class of invention.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In the preamble, the term "system" is confusing. The claims are directed to two classes of invention, an apparatus and a method (see last limitation of claim 1 and 3rd limitation claim 6). Claims should be directed to a single class of invention. Further, claim 1 includes an electronic certificate. It is not clear how the electronic certificate further limits the claimed apparatus. Also, in claim 2 and 7, it is not clear how the company information and PIN further limit the claimed apparatus.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Goyal et al. USP 6466917.

The reference teaches an apparatus for verifying the identity of buyers and sellers of a network based transaction including following elements:

l) plural electronic terminals connected to one another by a computer network; and

an authentication station connected to the computer network, (figure 5 and col. 1, lines 38-49).

an electronic certificate and a company code being assigned to each of the electronic terminals, (col. 4, lines 39-41)

when a commercial transaction is to be performed between one and another of the electronic terminals via the computer network, both selling and buying sides of the commercial transaction presenting the respective electronic certificates before performing the commercial transaction (optional language).

II) An electronic commercial transaction system according to Claim 1, wherein the authentication station is connected to the computer network via a server and has company information corresponding to the company codes (figure 5).

III) An electronic commercial transaction system comprising:

a PIN being assigned to each of the electronic terminals (col. 6, lines 36).
